Gallery

Collection of miscellaneous images mostly related to research and teaching. Click on image to get more detailed view.

Paraview versus Matlab

[On this page](#) you can find comparison of visualization of displacement field for a deformation of unit square into quarter of a disk. The visualization is done in Paraview and in Matlab.

Polyhedral mesh generation

Click on the image to see a short animation. More can be seen on the [PolyGen page](#).

Mesh adaptation

Couple of images and animation related to mesh adaptation can be found [this page](#)

L-5 Fun

Some funny pictures with L-5 Logo

L-5 Bending

Animation of elastic deformation of L-5 logo under its own weight (with some cheating as gravity acts not vertically :) Click on the image to start the movie.

Caution, the second animation is rather big, ~10MB, thus it can load slowly.

L-5 Rainbow

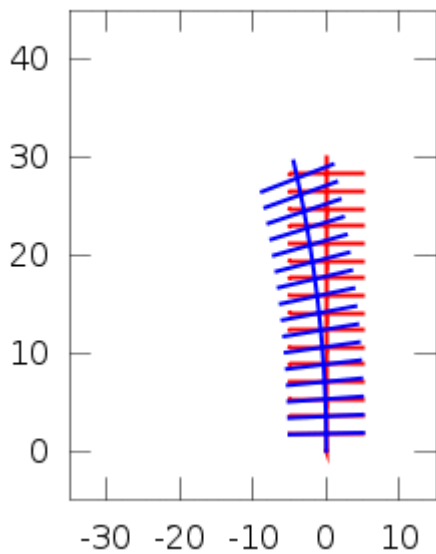

Animation of heat flow through a L-5 logo. Click on the image to start the movie.

More of similar images can be found at [my Google account](#)

Morphbar

“Bending a tree” - illustration of the idea from which Morphbar project has originated. More on [this page](#)

More images related to Morphbar project can be found on [its Trac wiki](#).

Rotating deformation of NURBS cage:

Influence of NURBS order on body shape:

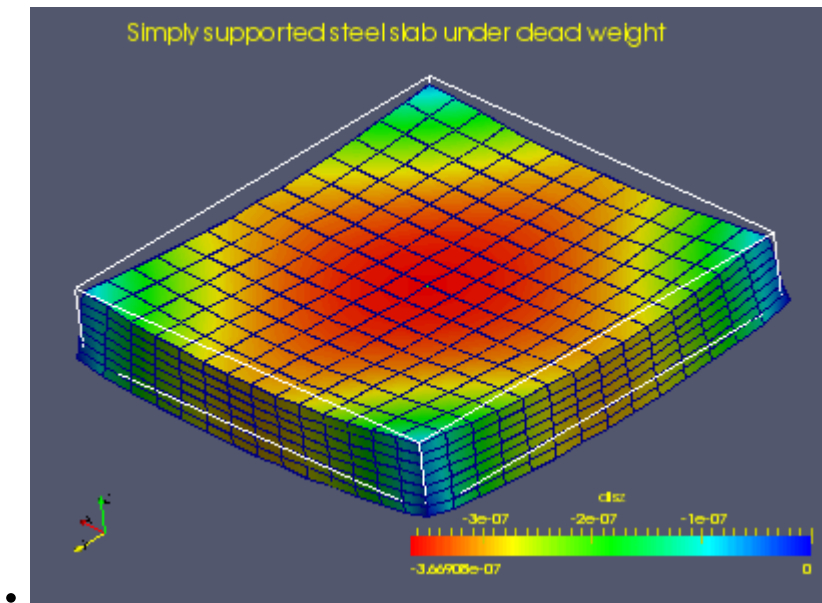

Playful, alegoric view on L-5 research areas

Concept: Roman Putanowicz and [Anna Perduta](#). Graphic design: [Marcin Tekieli](#).

More serious stuff
